

Joe Brown

Platform & DevOps Engineer

joe_ethan2@hotmail.com | 07977 977 974 | Westcliff-on-Sea, Essex | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

A technology professional with a strong background spanning Software Development, Cloud Infrastructure and Platform / DevOps Engineering. Currently working as a Platform & DevOps Engineer, delivering real world production impact across Kubernetes, CI/CD Pipelines and Azure Infrastructure. Bringing a full stack developer mindset to platform engineering, with a history of driving process improvements and technical initiatives from planning through to delivery. Open to Software Development, DevOps, and Platform Engineer roles.

Technical Skills

Primary

Languages: JavaScript, TypeScript, Go, PowerShell, Bash, KQL (Kusto), YAML, JSON, Bicep, Terraform (HCL)

Frameworks & Libraries: Node.js, Gin, GORM, Express, React, Angular, Jest, Supertest, Tailwind CSS

Tools: Git, GitHub, Linux, npm, kubectl, k9s, Helm, Confluence, Jira, TDD (Test Driven Development), Agile, MACH Architecture

Cloud & Infrastructure: Azure, Azure DevOps, Azure CLI, Azure Managed Grafana, Docker, Kubernetes, CI/CD Pipelines

Secondary

Languages: C#, SQL, PSQL, HTML, CSS

Frameworks & Libraries: .NET, ASP.NET Core, Entity Framework, xUnit, Sequelize

Tools: NuGet, PostgreSQL, SQLite

Cloud & Infrastructure: AWS, GitHub Actions

Education / Certifications

Northcoders Software Development Bootcamp (Full-Time)

Full Stack Developer

July 2024 - October 2024

Completed

Planned Certification Pathways:

- **Azure:**
AZ-104 - Azure Administrator, AZ-204 - Azure Developer, AZ-400 - Azure DevOps Engineer Expert
 - **Linux Foundation:**
Kubernetes and Cloud Native Associate (KCNA), Certified Kubernetes Administrator (CKA)
 - **HashiCorp:**
Terraform Associate
-

Professional Experience

Platform & DevOps Engineer – Parkdean Resorts UK

May 2025 - Current

- Configured and monitored managed Kubernetes clusters in Azure to support production workloads.
- Planned, architected, and implemented a new Git branching strategy across IT Delivery, overseeing adoption and producing supporting documentation and runbooks.
- Built and maintained multi environment Application Insights dashboards using KQL and Azure Managed Grafana.
- Owned and developed Azure DevOps pipelines, driving consistency and reliability across environments.
- Maintained and improved Infrastructure as Code (IaC) with Bicep/Terraform templates to provision Azure resources.
- Supported platform architecture planning and the creation of operational runbooks for Azure services.
- Developed lightweight internal tooling using Bash, PowerShell and Go to automate repetitive tasks.

Freelance Developer - Self Employed

Jan 2025 – May 2025

- Translated project requirements into structured tasks, following tickets and development workflows.
- Delivered optimised, accessible, and high performance web solutions across devices.

Trainee Software Developer - Northcoders Software Development

July 2024 – October 2024

- Software Development Bootcamp in JavaScript which covers full stack development focused on building web applications.
- Strong emphasis on Test Driven Development (TDD), with experience in paired programming.
- Explored the fundamentals and best practices of JavaScript.

Parts Supervisor - Group 1 Skoda/Seat/Cupra Southend

December 2021 – June 2024

- Oversaw an inventory value of £60,000 to £100,000 in parts and lubricants.
 - Selected to shadow the internal parts auditor at multiple sites, supervising full stock checks.
 - Assisted in biannual full stock checks, my previous results include:
 - September 2022 producing a **1.14%** error rate (**0.14%** if low-value parts are eliminated) and a **£25.00 gain**.
 - February 2023 producing a **0.53%** error rate (**0.00%** if low-value parts are eliminated) and a **£15.91 loss**.
 - September 2023 producing a **0.00%** error rate. **The first Group 1 UK stock check with zero variances.**
 - March 2024 producing a **0.21%** error rate.
-

Projects**Museum Curator ([Repository](#))**Backend: **JavaScript, Express, SQLite, Sequelize, Jest, & Supertest.**Frontend: **TypeScript, React, Vite, React Router, Shadcn/ui, TanStack Query, Tailwind CSS, & Axios.**

- Developed a web app to display curated digital collections with full CRUD functionality.
- Reinforced end to end full stack architecture in a production ready environment.

Dating App ([Repository](#))Backend: **C#, ASP.NET Core, Entity Framework, & SQLite.**Frontend: **TypeScript, Angular, Tailwind CSS, & DaisyUI.**

- Built via a tutorial to practice and experiment with a .NET backend and Angular frontend integration.
- Deepened my understanding of .NET patterns and Angular component models.

Tier List Creator ([Repository](#))Backend: **Go, Gin, GORM, & SQLite/PostgreSQL.**Frontend: **TypeScript, Angular, Tailwind CSS & DaisyUI.**

- Created a REST API and frontend to experiment with Go backend development.
- Used as a practical project for learning Go patterns and REST API design with Gin.

Portfolio Website ([Repository](#))Frontend: **TypeScript, React, Vite, TailwindCSS, Mantine, & React Hot Toast.**

- Designed and implemented a personal portfolio to highlight projects and skills.
- Practiced building a polished, production ready frontend.

NC News ([Backend](#) / [Frontend](#))Backend: **JavaScript, PSQL, PostgreSQL, Express.js, Jest, & Supertest.**Frontend: **React, Vite, Lottie, & Axios.**

- Built a full stack news platform with REST API, dynamic frontend, and comprehensive test coverage.
- Consolidated strong full stack fundamentals, with emphasis on RESTful API development.
